Bale Shaving Head

Integrated Misting System

A proud member of the
BouldinCorp™ Family

BP-05™ & BP-05™ HD Vertical Bale Processor

Model # 16412

An innovative look at bale processing has brought this Pro-Line unit to the market.

The BP-05 is a vertical bale processor that remains vertical during operation saving time, space and energy. Fully automated and programmable controls allows the grower to process various types of materials with their choice of optional outputs.

The functionality of the BP-05 continues as processed materials are easily directly loaded into various types of machines or other equipment, eliminating the need for a secondary conveyor. Bale processing has never been this quick and easy.

Specifications

Power	220V single phase
Production	55 or 110 cubic foot bales on standard model 135 cubic foot bales on HD model
Options	Single or three phase Fertilizer/ chemical dispensing

Vertical machine for taller hoppers
or space saving

Made in the USA
