Helical Rollers

One adjustment for
different pot sizes

A proud member of the
BouldinCorp™ Family

Pot Dispenser

The EP Pot Dispenser will dispense from 6" to 12" pots and can be fully integrated with the EP2200 and EP2200 EX. It can also be added to other potting machines dependent on type and size

This dispenser is extremely easy to setup and adjust. The pots are loaded by the in-feed conveyor which can be preloaded with several stacks of pots. Pots are picked up and stripped by helical rollers which feed them directly to the potting machine. Adjusting from one pot size to another is easy. Simply turning one adjusting wheel which adjusts the helical rollers to match the diameter of the pot to be dispensed, and it's done.

- Fast and easy to setup
- Wide range of pot sizes
- Variable speed pot stripping
- Compatible with multiple potting machines

Guide Rail

Made in the USA
