Provides constant flow of evenly mixed soil

Agitators for uniform material flow

A proud member of the BouldinCorp™ Family

# MixMaker™ 25

## Mixing System

### Model # 12018 (single phase) 12019 (three phase)

The MixMaker 25 Mixing System supplies on-demand delivery of specialized mix suitable for both nursery and greenhouse operations. It can be fully integrated with flat filling or potting equipment. Supply can be fully automated or manually controlled by an operator.

The MixMaker 25 Mixing System provides a constant flow of evenly mixed soil, including chemicals and fertilizers. The unique FloThru™ Mixing Head ensures that every sampling of soil has the proper ratio of nutrients called for in the formula.

This unit is capable of 25 cubic yards per hour of consistently blended media types such as peat, bark, sand, top soil, compost, rice hulls and fertilizer/chemical blends. The MixMaker 25 features mixing head with auto water, audible alarm, and automatic system shutdown for empty hoppers.

## Specifications

Power	220 V/ Single or three phase/ 50 or 60 Hz
Production	Up to 25 cubic yards per hour
Dimensions	Subject to specification
Weight	Subject to specification
Features	Stainless steel chemical hoppers
Options	Crosswise agitators Fully computerized controls for on-demand changes or multiple recipes

**Optional variable speed package with recipe management**

Made in the USA
