SPD Pot Dispenser

Model # 13535

The SPD Pot Dispenser is a labor saving device that automates shuttle tray pot loading. Designed to reduce labor costs and increase productivity. Pots are loaded in stacks into the carry rack and separated one by one with precision placement into individual shuttle trays.

Benefits- Eliminates need to pre-fill shuttle trays thus saving space, reduces labor costs, changeover is quick and easy, multiple tray configurations are stored in PLC.

Features:

- PLC controls with servo driven actuator
- Linear movement for precise positioning
- Speed can be set to match with production equipment
- Quick change head for different pot sizes
