Electric Bagger

Model # 17021

Electric Bagger is designed to handle potting soils, coir, compost, chipped mulch, bark nuggets into an even flow for bagging. The electric drive system will allow you to fill as many as 18 bags a minute.

If the hopper becomes empty, a sensor under the conveyor will start another conveyor/hopper (if so optioned) to fill the hopper. Bag filling can be either by volumetric or by weight dependent of material.

Volumetric is standard but by adding weigh scale option bags are filled by weight but still allowing volumetric if and as needed. PLC controlled and HMI giving access to all programmable features.

Specifications
