Power pot transfer

Soil return belt

Fold-out brush assembly

A proud member of the
BouldinCorp™ Family

133-FX

Model # 13341

The FX filler uses a cascading soil delivery for very uniform filling. High Speed production and consistent uniform filling of multiple types of containers are characteristics that define the FX Filler.

Equipped with a variable speed belt soil delivery system, this machine is capable of filling a full range of containers from plug trays to hanging baskets and patio planters up to 16" tall.

The standard FX includes a variable speed filling conveyor; variable speed soil feed, all belt system, with a powered pot transfer; one cubic-yard soil hopper, self-cleaning powered rotary brush and rotary power sweep, a belt soil return system, and a soil flow diverter for larger containers.

The single crank adjustments make the FX a very versatile and efficient flat and pot filler. Direct drive gearboxes and sealed bearings aid in low maintenance.

Power Sweep adjustment

Guide rail adjustment

Adjustable soil flow

Specifications

Power	220V / single or three phase
Dimensions	116"L x 95"W x 82"H
Production	Up to 1,350 pots per hour
