Power pot transfer

Power Brush

133-FX

Model # 13341

The FX filler uses a cascading soil delivery for uniform filling. High Speed production and consistent uniform filling of multiple types of containers are characteristics that define the FX Filler.

Equipped with a 1.5 cubic yard hopper and variable speed belt soil delivery system, this machine is capable of filling a full range of containers from plug trays to hanging baskets and patio planters up to 16" tall.

The standard FX includes a variable speed filling conveyor, variable speed soil feed, all belt system, with a powered pot transfer, 1.5 cubic-yard soil hopper, self-cleaning powered rotary brush and rotary power sweep, a belt soil return system, and a soil flow diverter for larger containers.

The single crank adjustments make the FX a very versatile and efficient flat and pot filler. Direct drive gearboxes and sealed bearings aid in low maintenance.
